

Help

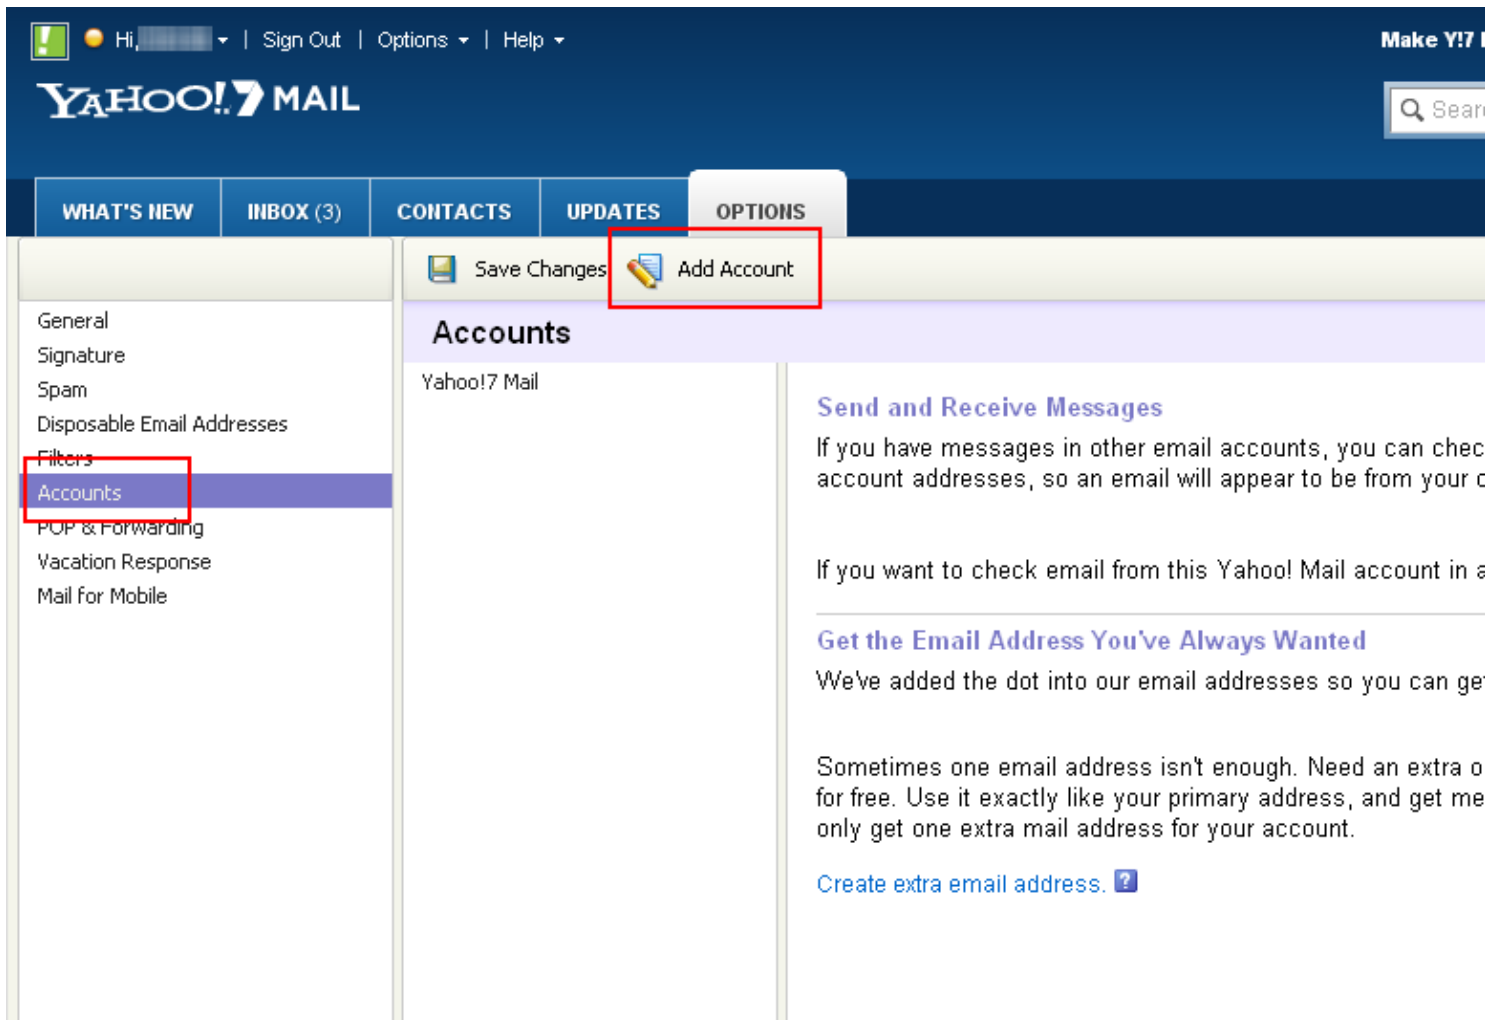

Add a second email address to Yahoo!

To simplify checking your email, you can add an alternative address to Yahoo! mail and send / receive emails using that address. Follow these steps in order to set up your alternate email address.

1. From the Yahoo! mail homepage, select Options > Mail Options... in the top left corner

2. Select Accounts from the left, then click Add Account

3. Enter your mail settings. Your settings would have been provided by Derek's Web Design when your email address was set up. To request your settings, please [contact us](#).

Your account name(john@yourdomain.com.au)

Sending Mail

Account name:

Set as default sending account

Your 'From' name:

Email address: [Change reply-to address](#)

Receiving Mail

Deliver incoming messages to: ▼

Username:

Password:

Server:

Advanced options:

- Use SSL
- Use Filters
- Override default POP port
- Retrieve new messages only
- Leave mail on POP server

A confirmation email will be sent to your address.

4. To confirm the addition of this email account to you Yahoo! mail, you need to access your account via the [webmail portal](#) at Derek's Web Design. Access [webmail](#) and enter your settings as follows:

Webmail Access

Please provide your username and password.

@

Password:

Language:

Protocol:

5. Open (by double-clicking) the welcome email from Yahoo! and follow the instructions to confirm your email address
6. Once complete, you will be able to send emails from this address by selecting the account in the dropdown which displays next to the 'From' field

From: (Yahoo!7 Mail) <.....@yahoo.com> ▾

To: (Yahoo!7 Mail) <.....@yahoo.com>

Cc: John <john@yourdomain.com.au>

Subject:

Times New Roman ▾ 12 ▾ **B** *I* U ▸
